

KEY INVESTOR INFORMATION

This document provides you with key investor information about the *Fund*. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in the *Fund*. You are advised to read it so you can make an informed decision about whether to invest.

Managed Defensive Fund, a sub-fund of the RBS Investment Funds ICVC (Accumulation share class I ISIN: GB00BGWKS610 / Income share class I ISIN: GB00BGWL7G75)

The Fund is managed by RBS Collective Investment Funds Limited.

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to provide an increase in value over the long term. The majority of the return will reflect income received with some potential for capital appreciation.

The current policy of the Fund is to be primarily exposed to lower risk assets, such as UK and overseas bonds, while retaining a material exposure to higher risk assets such as UK and overseas equity shares. The Fund will do this by investing in a range of other funds and directly in bonds and equity shares with allocations determined by the Investment Manager. The Fund also has the potential to invest in alternative asset classes including property and alternative investment funds. The Fund will be managed relative to the Benchmark shown. The Investment Manager will manage the risk profile of the Fund via divergence from the Benchmark within an agreed Tracking Error of 4%.

Managing the Fund in this way will constrain the extent to which the Fund's performance differs from that of the Benchmark and therefore limit the potential return - both above and below the Benchmark return.

This is an active fund which means the investment manager makes the decisions about how to invest the Fund's money. These investment decisions will always be made within the constraints of the Fund's objectives and investment policy. The benchmark is used to constrain the risk of the Fund but the Investment Manager will choose the assets held, and does not aim to track the benchmark.

The Benchmark has been selected to determine the level of risk for the Fund. Indices used within the Benchmark to represent particular asset classes have been chosen to provide an appropriate representation of those asset classes and due to the data being made available from the Index Provider at a reasonable cost.

For liquidity management purposes the Fund may also invest in cash instruments, deposits and cash funds. The Fund may also use Derivatives for Efficient Portfolio Management purposes.

Funds in which the Fund invests may also invest in Derivatives for investment purposes as well as for Efficient Portfolio Management purposes.

Asset Class	Benchmark	Weight
Government Bonds	Bloomberg Barclays Sterling Gilts TR Index Value GBP	43%
Investment Grade Corporate Bonds	Bloomberg Barclays Global Aggregate Credit, TR Index Value Hedged GBP	22%
UK Equity shares	MSCI United Kingdom Index (GBP)	14%
Global ex UK Equity shares	MSCI ACWI Ex-UK Index (GBP)	21%

You may normally sell your shares in the Fund on each Business Day. Requests to sell received and accepted by 3pm on a Business Day will be dealt at the price calculated on that Business Day.

The Fund issues both Accumulation and Income shares. If you hold Income shares you can choose to have your distribution of income paid directly to your bank or building society current account. Alternatively, you may choose to have income distributions automatically reinvested, to purchase further shares of the same Class and Fund.

The Fund is designed for retail customers with little or no experience of investing in collective investment schemes and basic or no knowledge of the characteristics and risks of investing in equities and bonds (capital markets).

A typical investor in the Fund has a low to medium tolerance for risk; they accept that the value of their investment may fluctuate and they have a low to medium tolerance to bear losses to their capital. The minimum investment horizon is 5 years.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Typically lower rewards ← Typically higher rewards

These ratings indicate how the Fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a higher risk of losses. The lowest rating does not mean a risk free investment.

This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past.

The risk and reward category for the Fund is not guaranteed to remain unchanged, and may shift over time. Historical data, such as is used for calculating the rating, may not be a reliable indication of the future risk profile of the Fund.

The following risk factors contribute to the overall risk and reward indicator:

1. The Fund invests in company stocks and shares and their value depends on the financial state of the underlying companies. Any fall in the financial outlook for, or failure of, such companies can reduce the Fund's share price.

2. As the Fund holds fixed interest securities, the Fund's share price will rise and fall due to movements in interest rates and inflation.

3. The Fund invests in overseas investments and the share price will go up and down in line with movements in exchange rates as well as the changes in value of the Fund's holdings.

4. The Fund may have some investment in securities issued by companies in so-called 'emerging markets'. This carries a higher risk than investing in larger, established markets. Investments in emerging markets are likely to experience greater rises and falls in value, and may have problems in trading and settlement.

5. The Fund may have some investment in property via funds or property company shares. The valuation of property is generally a matter of valuer's opinion rather than fact. Property may sell for less than it is valued at, which would then reduce the Fund's share price.

CHARGES

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or paid out	
Charges taken from the Fund over a year	
Ongoing charge	1.47%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The charges you pay are used to pay the costs of running this Fund, including the costs of marketing and distributing it, but not the costs of any advice you have been given. These charges reduce the growth of your investment.

Any entry and exit charges shown are maximum figures, and in some cases investors may pay less.

The ongoing charges figure shown here is an estimate of the charges.

The ongoing charges figure would ordinarily be based on expenses incurred in the previous financial year. As the Fund was launched on 17 May 2019 insufficient data is available and therefore the ongoing charge has been estimated.

For more information about charges, please see the Fees and Expenses section of the Fund's Prospectus.

As the Fund was launched on 17 May 2019 past performance is not available. Past performance is not a reliable guide to future performance

PRACTICAL INFORMATION
